

Since 2013

TASKEEN GLASS

Technical Glass Co.

ABOUT US

Taskeen Glass is an aspiring company started in February 2013 with a special motto to provide superior quality services in the field of glass processing, supply and installation.

We are committed in providing high quality glass products viz. toughened glass, insulated glass, laminated glass for all types of commercial & residential requirement.

We also specialize in providing turnkey solutions for balustrades & railings, canopies, spider glazing, glass facade, hinged and sliding shower cubicles, single heighted doors and partitions, security cabins, glass site cabins etc.

We firmly believe in good & clear business ethics, you grow we grow policy; with many clients in the region for commercial and residential projects we have become a one stop source for all glass, hardware supply and installation needs.

WHY GLASS?

- ✓ It is a modern product with aesthetic look.
- ✓ It gives a spacious look to the environment, increasing the land value.
- ✓ It is highly durable product and requires no maintenance.
- ✓ It is easy to install in all external & internal applications saving time and labor involved thereby economizing cost of a project.
- ✓ It is available in a range of tints to make your environment eco-friendly which could help in saving energy costs.

SURAT SITE

WHY TASKEEN GLASS?

We promote green projects. Right from initial project stage, we assist our client to select the right glass that serves the right purpose, optimize the sizes to reduce cost, reduce delivery times, reduce handling & installation labor and select calculated hardware. We believe in recurring cost savings over years than timely cost savings in a project.

OUR PRODUCTS

TOUGHENED GLASS

Toughened Glass or Tempered Glass has more than five times the strength of an ordinary glass since it undergoes a heating process inside a furnace at about 700 deg. followed by immediate quenching thus in the event of accident breaks into small un-sharp fragments that are unlikely to cause harmful injuries.

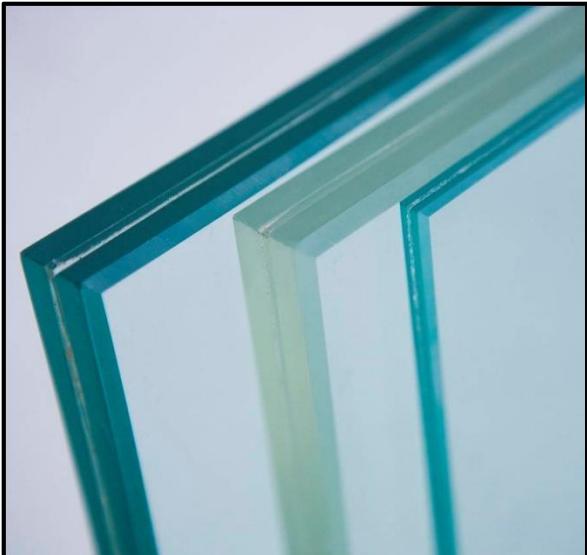

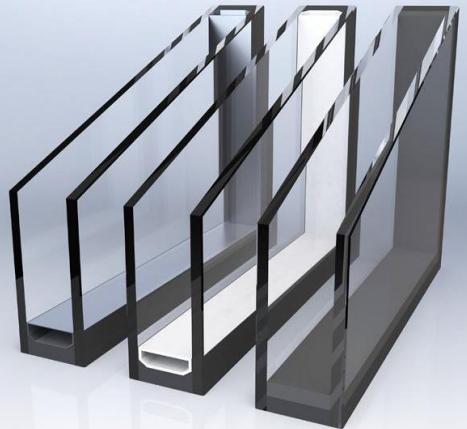

It is intended for facades, building entrances, office doors & partitions, bath & shower enclosures, canopies & balustrades and other uses requiring superior strength and safety properties.

INSULATED GLASS

Insulated Glass is a combination of two panes of glass with an aluminum spacer in between which is filled with desiccant.

Insulated Glass can be used for sound proofing and can reduce noise by up to 30 decibels. For better acoustical properties, filling of special gases like SF6 and use of one pane as laminated glass is recommended.

Insulated Glass used for thermal insulation can be designed to reduce heat loss and solar heat gain entering the building with minimal reduction of visible light transmittance.

LAMINATED GLASS

Laminated Glass is a combination of two panes of glass with a PVB or Sentry interlayer in between. The two panes are bonded together to the interlayer using a closed chamber high pressure and temperature process.

The strength of the laminated glass is higher and it is highly used as a safety & acoustic glass and in event of breakage, portions of glass remains adhered to the interlayer preventing fall off. The laminated glass can be made in various combinations.

Now a days, laminated glasses are widely used than toughened glasses as it serves as a multipurpose glass.

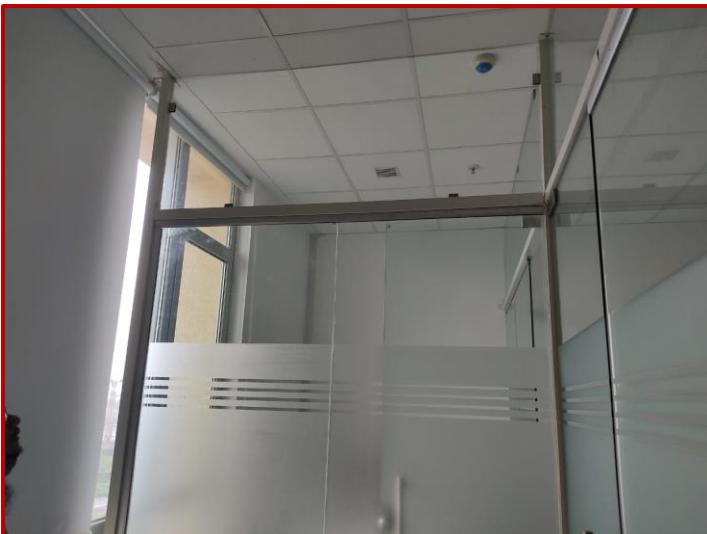

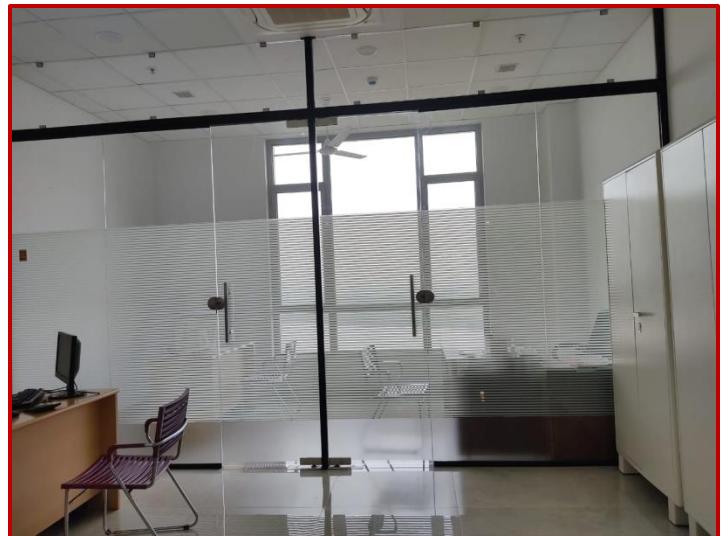

GLASS SELECTION TIPS

1. Criteria is strength, go for toughened glass.
2. Criteria is sound and thermal insulation, go for insulated glass. (Recommended both panes toughened).
3. Criteria is strength, safety, sound and thermal insulation, go for laminated glass.
